

# RECYCLING PLASTIC

-Jerusheya

**Hii everyone.....**

I am Jerusheya. I am going to explain the life  
of a recycled plastic bottle  
named **APPIE**.

## INTRODUCTION

APPIE was a bottle thrown away by a boy into the trash can with the symbol of recycling on it.

## PICK UP STAGE

01

**There comes a trashman who took Appie to a truck which was filled with trashes.**

**02**

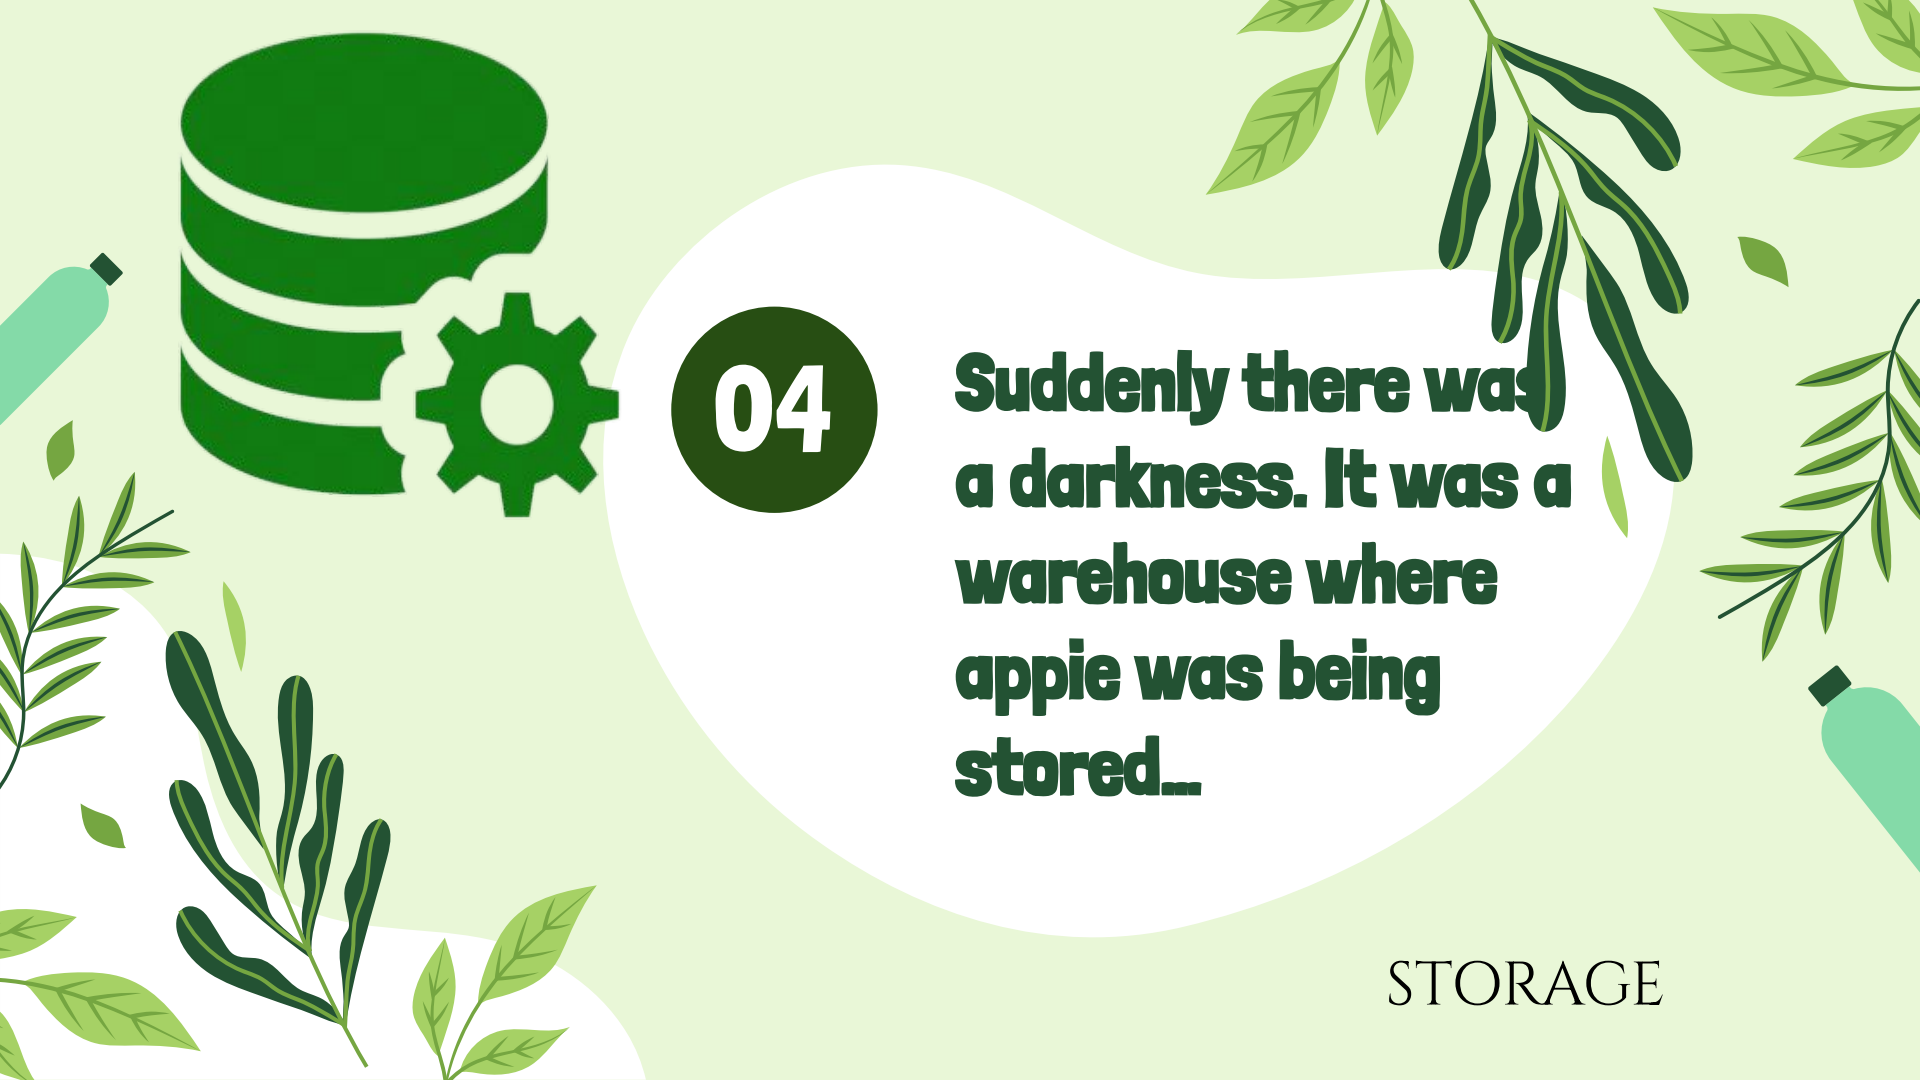

**Appie went happily with his new friends in a trash truck. While the journey was more shaking and jumping.**

03

**Appie reached a  
plastic recycling  
company.**

**04**

**Suddenly there was  
a darkness. It was a  
warehouse where  
appie was being  
stored...**

STORAGE

**05**

## INSPECTION

**There comes a inspector, appie was very nervous because he was the next to be inspected...Appie was selected and the inspector took Appie to a crusher. Appie's heart starts beating faster on seeing the big tooth of the crusher.**

## CHOPPING STAGE

06

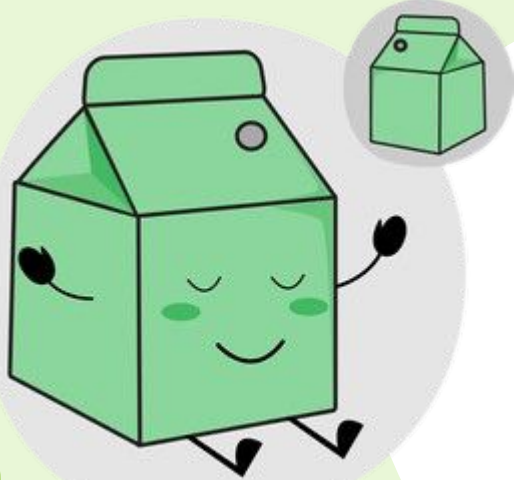

**But he does know that no one can achieve something without undergoing a rough path. So he went into it by bringing more confidence.**

**07**

**Appie was now chopped into a apple shaped small piece and undergone a bath. He became totally a new baby....**

## PACKING AND SHIPPING

**He was then packed  
and shipped to new  
users who loves him.**

“Life crushes you before  
giving you something big  
and great”

**—APPIE**

# Main steps in recycling:

**inspection**

Inspected to find out the type of plastic.

**chopping**

Chopped by a crusher and made into pieces

**bathing**

Undergone bath with biodegradable soap and water
